

## Flowcrete New Corporate HQ

Sandbach, Cheshire

**Status:**

Completed February 2010

**Value:**

£800,000

**Client:**

Flowcrete UK Ltd

**Description:**

This project involves the re-use of unoccupied frontage buildings at the Flowcrete Production Facility.

The client wanted a new striking corporate HQ that was environmentally responsible. In addition to re-using the old buildings this involves high levels of insulation and air tightness allied to heat exchanging natural ventilation utilising windcatchers.

The new section of the building has a green roof and the whole complex is heated using underfloor heating and ground source heat pumps.
